ALBANY...The Hub City

Albany, the Hub City of the Willamette Valley, was established in 1848 in the heart of one of the richest agricultural and timber areas of the nation. It grew quietly and unspectacularly until the war years brought an unprecedented boom, virtually tripling the population of the city and suburban areas in slightly more than a decade.

The city gets its slogan of "The Hub" due to its geographic relationship to the state and particularly the four flourishing counties of Linn, Marion, Polk and Benton in the Willamette Valley. Pacific Highway 99, main Los Angeles to Canada thoroughfare, intersects with U.S. Highway No. 20, longest east-west highway in the nation. Both highways and the many county roads connect with great recreational resources and form one of the most scenic areas in the United States. Mount Jefferson, the Three Sisters, Hoodoo Ski Bowl, Clear Lake, Suttle Lake and Blue Lake are within short drives to the east. The Willamette River offers aquatic sports north and south, and the Oregon Coast, with its numerous resorts, can be reached via two alternate routes to the west by a short drive.

Timber and agriculture share about equally in the economy of Albany and are the basis for most of the industries of the city. Plywood mills, lumber mills, a furniture factory are typical of the timber industries, and the city is at the crossroads of the logging industry. Freezing plants, canneries, meat packing plants, and poultry processing are typical of the food processing industry. The city is the capital of a highly profitable seed production area.

Commercial and industrial industries have developed along Highway 99 west of Albany to such an extent that the area has become known as the "Miracle Mile." Virtually all major West Coast motor freight companies serve the city. Albany is the rail hub serving as the center for six branches of the Southern Pacific Railroad as well as the north-south main line. The Spokane, Portland and Seattle (Oregon Electric) main line and extensive yards center at Albany. Thus the rail and highway combinations combine to make the city an ideal location for distribution type businesses.

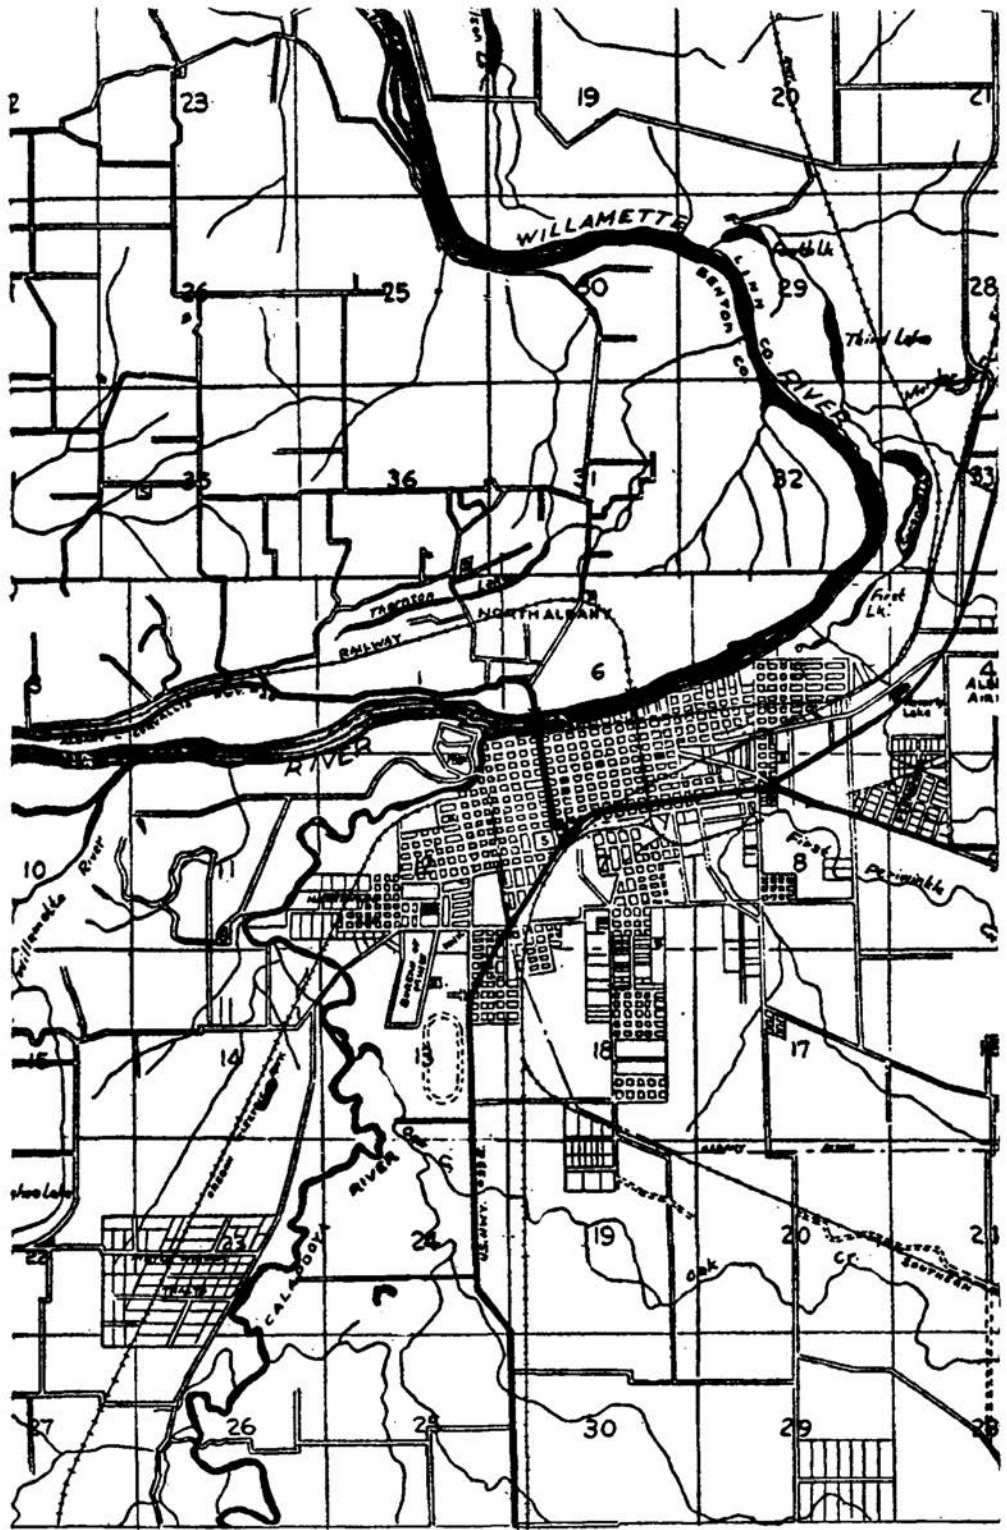

The Albany Chamber of Commerce is equipped to handle all types of inquiries dealing with the economic life of the community and will welcome all such inquiries from citizens of Albany and the area as well as from visitors, newcomers, and prospective residents.

This is your 1952 directory of Albany and the Albany rural routes. The book has been compiled as a public service project by the Merrill & Merrill Advertising Agency, through authorization of the Albany Chamber of Commerce and by the advertisers in the book itself.

This is the second time an Albany City Directory has been made available free of charge to the heads of families and businesses listed in the directory. Every effort has been made to make the canvass of names accurate and complete. If, however, you detect errors or omissions, please notify the Chamber of Commerce office in writing so the master list which was used in the compilation of this directory may be corrected.

It is the intention of the Chamber of Commerce to publish the directory annually, or as often as is deemed necessary. For that reason the staff of the Chamber of Commerce would appreciate it if you will ask newcomers to Albany to register at the Chamber of Commerce so that their names may be included in the next edition.
