

TOILET REBATE PROGRAM

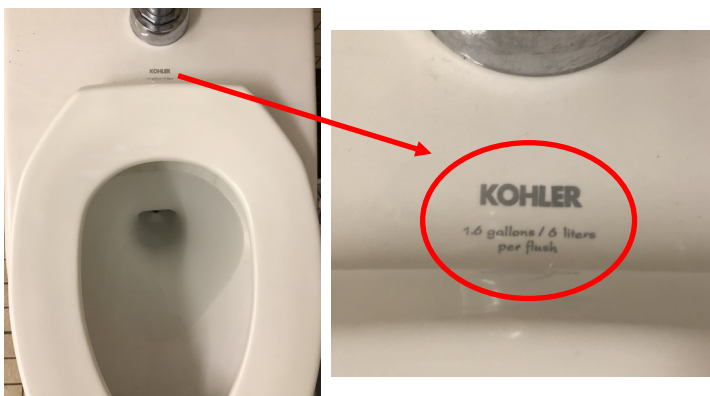

Replacing inefficient toilets is a great way to save water and money! The City of Albany is offering a \$50 rebate for replacing an old toilet with a high efficiency toilet (1.28 gallons per flush). Rebates are limited and awarded on a first-come, first-served basis

Eligibility

- Must be a City of Albany water utility customer
- Replace an old toilet with a high efficiency toilet (1.28 gallons per flush)

How to Participate

- Purchase a high efficiency toilet. Many models have a [WaterSense](#) label on them.
- Install the new toilet. Make sure the old toilet is disposed of properly. Contact Republic Services for information about disposal.
- Submit the attached application within 3 months of purchase and installation.
- Households are eligible for up to two rebates to be applied to the monthly utility bill.

How to Check Flush Volume

- Look for a marking or label near the seat hinge. All the newer toilets have a mark that states the gallons per flush (see example on left)
- If you don't see such a mark, check the underside of the tank lid or the back wall inside the tank for a date stamp. The year the toilet was made is often stamped into the porcelain– toilets made before 1994 will typically use over 3 gallons per flush.
