Dear Bret,

RE: BACKFLOW TEST

Our records indicate that we have not received the annual test report on the following backflow prevention assembly:

310 Waverly DR NE
Albany, OR 97321

Type	Size	Make	Model	SN	Due
AG	2"	WILKINS		3113036	00/00/00
End of 53rd N Side of Road in Green Box					

In order for backflow prevention assemblies to operate efficiently they must be tested and serviced when required to be in compliance with **11.01.225 of the Albany Municipal Code and Oregon Administrative Rule 333-061-0070** The listed backflow prevention assemblies must be tested annually by a certified and licensed tester.

This letter is to give you notice that the requested tests must be completed and the necessary inspection forms returned to this office by **08/26/16**.

Included for your convenience is a list of current assembly testers in the area. If you have any questions, feel free to contact me at the above address or you may phone 541-791-0031

Sincerely,

Bret Johnson
